

Purpose of Proposed Boundary Changes

The proposed boundary changes fulfill the 2017 Facility Master Plan recommendations to:

- Create a school attendance boundary for a new southwest Kiker and Baranoff relief school; and
- Consider a boundary adjustment between Baranoff, Boone, Cowan and Kocurek to relieve overcrowding at Baranoff and Cowan, with the goal of balancing enrollments.

The new southwest elementary school is in the Avana subdivision on land donated by the developer.

Construction is funded through the 2017 Bond program, and the school is scheduled to open August 2020.

The 2017 Facility Master Plan has established a target range of utilization of 75%–115% of a school's permanent capacity (without portables).

The BAC's preliminary recommendations are projected to get these schools within the target range.
