PEDIATRIC VACCINE STRATEGY
Multi-Pronged Approach for the COVID-19 vaccine for 5-11:

Direct Operations
• Five established locations, Shots for Tots Far South and St. Johns, Delco, Sims, and Pflugerville
• Pop up clinics at school sites

Parent education
• Community based trusted source through Community Health Workers
• Focus on neighborhoods and schools in areas with limited access to vaccines. Specific zip codes include 78744, 78617, 78724 and 78752
• Provide education events at schools including
  • presentations for parents/caregivers
  • tabling at schools
  • neighborhood outreach through block walking and distributing flyers

Provider support
• Provider meeting Nov. 5th reached 60 pediatric health care providers to address TA needs, safety concerns and connect the provider network
• Provider survey in the field to identify needs and network capacity
AISD Pediatric Vaccine Clinics

Old Sims Elementary School Gymnasium
(Moderna, J&J, and Pfizer 5+)

AISD Vaccine Education and Outreach

Case Study: Education and Outreach to support the Pickle School Vaccine Clinic

1 tabling event at Pickle Elementary
- 1 presentation for parents/caregivers
- 2 block walking events at nearby apartment complexes
- 1 flyer distribution at nearby businesses

Outcome: 72 vaccinations provided on 11/16

Additional events are planned to support Houston, Brown, and Perez school clinics in December
Do you plan to vaccinate your child (or children) aged 5-11 years with the COVID-19 vaccine once it is approved?

Parents and Caregivers of 17,558 children are represented based on the question “How many children aged 5-11 years do you have in your household?”

Will Respondents Vaccinate their Children?

- Yes, 64%
- No, 27%
- Unsure, 8%
- Only If Required, 1%

Parents and Caregivers of 17,558 children are represented.

The COVID-19 vaccine is safe for children aged 5-11 years old.

The COVID-19 vaccine can protect children aged 5-11 years old from getting severe illness from COVID-19.

The COVID-19 vaccine is effective for children aged 5-11 years old.

I think children aged 5-11 years old should get the COVID-19 vaccine when it is approved.
The COVID-19 vaccine is safe for children aged 5-11 years old.
The COVID-19 vaccine is effective for children aged 5-11 years old.
The COVID-19 vaccine can protect children aged 5-11 years old from getting severe illness from COVID-19.
I think children aged 5-11 years old should get the COVID-19 vaccine when it is approved.
We received 1,064 responses from AISD. We removed 65 responses with invalid zip codes and 11 responses with 0 or more than 99 children aged 5-11, yielding 988 responses for analysis.

We received 971 responses in English, 16 in Spanish and 1 response in Simplified Chinese. They represent 1,486 children.
Most respondents plan to vaccinate their children. Respondents that plan to vaccinate or are unsure were asked to rank vaccination location options. Most (65%) respondents chose their doctor’s office as their first choice. 17% chose schools and 7% chose community vaccination clinics as their first choice. Most respondents ranked community clinics as their 3rd choice.

### AISD Respondents' Pediatric Vaccination Plan
