

## Academic Reinvention Projects [Revised 01.27.2020]

New or enhanced academic programs to promote power skill development, increase equitable access to programming, and increase student enrollment.

Proposed Program	Location	Description
<b>School Changes</b>	Various Campuses and other Facilities	All students deserve opportunity and access to experience a 21st century education that prepares them for their dynamic and changing future. This will ensure that AISD is reimagining how our schools could be used to benefit students and communities, reinvesting resources to bring the visions into reality, and reinventing how students are educated in our district.
<b>Career Launch Early College and P-TECH programs</b>	Akins ECHS Crockett ECHS Navarro ECHS LBJ ECHS Northeast ECHS	The Career Launch 9- 14 model addresses postsecondary degree completion and career readiness by smoothing the transitions between high school, college, and the professional world. The model is designed to motivate and enable more students to earn a college degree and successfully transition into the workplace with the preparation and skills needed by employers.
<b>Dyslexia Middle School Program</b>	Covington Middle School	Teachers will receive comprehensive professional learning to understand the challenges of the dyslexic student and will enable them to deliver instruction in a manner that is more accessible to a student with

		dyslexia. Students will be able to participate with general education peers in all courses available on each campus.
<b>Montessori Program</b>	Winn Elementary	The Montessori Method is a child- centered educational approach based on scientific observations of children. Multi- age groupings are the hallmark of the program where younger and older learners reciprocally benefit from experiencing the program together. Children work collaboratively using problem- solving skills and social skills, fostering brain development through the work with their senses.
