Appendix B:

Departmental Needs and Initiatives

The AECOM Assessment Team was asked to support the FABPAC Departmental Needs Sub-Committee in gathering information to develop potential bond projects from all AISD departments. This effort began on June 20th, 2016, and continued through February and March 2017. Conversations involved both the long-term vision and goals, and the immediate and near term needs for each department. The Sub-Committee, district staff, and AECOM conducted a series of workshops to define and prioritize this information into potential projects. These projects include facility deficiencies, facility renovations, new construction, contingency needs, and equipment needs. All project information was included in a database, which has been through multiple rounds of vetting with the Sub-Committee and AISD leadership. After projects were refined, AECOM used an independent cost estimator to produce capital cost estimates for each project.

The database contains a few categorizations to prioritize the potential projects. They are as follows.

**FMP Category** – A recommendation for each item as this dataset moves into the FMP

- **Critical – Immediate** - Projects that cannot wait for modernization, and need to happen immediately, with or without modernization in years 1-6.
- **Necessary – Near Future** – Projects that can wait longer for modernization, but if modernization is not in years 1-12, they should be implemented in years 1-12.
- **Necessary – Contingency** – Funds allocated for anticipated projects that must happen as they arise (roof repairs, portable moved, etc.). This allows for saving M&O funds.
- **Include with Modernization** – Projects that can and should wait for modernization.
- **Enhancement** – Projects that are asks or enhancements, and can be included throughout the FMP. FABPAC will need to decide what to include where, and when.
- **Needs Further Consideration from FABPAC and Staff** – Projects that need more input, often on the long term vision of the department, before when they might be executed can be determined.

**Combined Score (X.Y)**

The members of the Facility and Bond Planning Advisory Committee, under advice of the AISD Board of Trustees, are seeking to include robust language for strategic vision for the Athletics Department in the next Facility Master Plan. As such, we have brainstormed several questions to spark our next conversation with the Athletics Department. Your department is invited to join us for a 20-30 minute conversation at our FABPAC meeting on Wednesday, March 8th.

Strategic Vision:
- How do you see your department (and their related facility/capital needs) changing over the next 25 years? How would that 25-year change manifest over the next 5-10 years?
- What is the strategic vision for you department in the next 25 years - not just needs, but wants as well? What small steps, order of events, and timing would you anticipate occurring to realize the vision in 25 years?
- How does your vision/plans RE-INVENT/MODERNIZE your department/subject matter and facilities?
- Dream big. Once we can catch up on basic needs, what do you need? If you didn't have to worry about $, what would you want to see?
- If money were not a concern, what would be your dream ask?

Shared Facilities versus School-based facilities
- Given our huge district do you see mega-facilities for all to use or a more regional school-based approach? Why?

Public/Private Partnerships:
- Has your department initiated strategic conversations on public/private partnerships and do you have potential for outside funding and long-term sustainability outside of capital improvements (bond spend)?

Athletics Department-Specific Questions:
- Are you satisfied with the existing athletics facilities in AISD?
- How would you suggest we get all of our Football games on Friday night?
- Do you believe grass or turf is a better financial investment for district high schools?
- What would lights at all high schools enable?
- Natatorium? Where do our swimmers currently swim? What time of day? Would a district facility alleviate practice time/trouble?
I would like to see a strategic plan that analyzes needs and costs for a natatorium. And/Or a major combined facility perhaps south that includes football, baseball, soccer, lacrosse, swimming etc? A draw for the whole district like the PAC. For LONG term plan— Have we considered Ways to build out (later upgrade ) burger center to be even more comprehensive and modern?

- What would be necessary to promote and support athletics at the elementary and middle school levels?
- Please prioritize top needs for on-campus and shared facilities. (We have trouble identifying whether needs for shared fields and stadiums are more or less urgent than for improvement to local tracks and fields.)
- Are there non-AISD athletic foundations that can assist/partner?
- Are there non-AISD strategic venues across the district for all sports?
- Given the flooding issues at House Park, is this facility worthwhile to continue?
- I would like to know what their thoughts were regarding a natatorium that would serve the needs of high schools, and how and where would that best serve the community. Also, we have heard from a few parents about suggested changes to our stadiums in both middle and high school as well as playing games on additional nights. I would like to hear their input on these ideas.
- There has been talk of an iconic sports complex. Does this fit your strategic plan? Where would it be? What would it need? How does it get utilized across the district? How does it affect other venues?

We don’t require written answers to all of these questions, but any written response addressing the spirit of the questions will be valued. Please be prepared to discuss these questions at our next FABPAC meeting on March 8th.
FACILITIES AND BOND PLANNING ADVISORY COMMITTEE MEETING

STRATEGIC VISION STATEMENTS FOR ATHLETICS, CTE, & FINE ARTS
ATHLETICS STRATEGIC VISION
The vision for athletics in the Austin Independent School District is to reinvent the urban school experience by providing opportunities for teaching, learning, and growing in all student athletes through the development of the athletic programs in all of our schools.

1. Ultimately knock down all **three stadiums** and rebuild through a phased in approach.

2. **Build a new AISD F.A.S.T.** (Fitness, Athletics, Swim, Technology and Training) Center in north Austin, Central Austin, and in South Austin.

3. **Partner with community** and surrounding businesses on use and marketing agreements.

4. **Marketing boards** are used for advertising throughout the day and as scoreboards during the competition. This will generate revenue for the District and help maintenance of the boards. Partnerships would start with existing partners like A+ Federal Credit Union, Academy Sports and Outdoors, Pizza Hut, etc.

5. **Build two mini regional stadiums approximately 5,000 – 7,000 seats North and two South.** Potential locations could be at L.A.S.A., Lanier, and LBJ for North and Bowie and Crockett for South.
F.A.S.T Center
Fitness, Athletics, Swimming, Technology and Training

Three Locations:
North, Central, & South

Simplifies staffing and facilities to regional centers.

Increase marketing opportunities that provide income for AISD.

Focus on partnerships with community.

Create training spaces for AISD students & community.

Meeting spaces can be used for AISD trainings, community engagement, and conferences.
F.A.S.T Center
Fitness, Athletics, Swimming, Technology and Training

Community shared fitness centers allow for a comprehensive approach to fitness.

Swim Center to be used by AISD teams and community.

The facility helps with scheduling of training and fitness needs for all AISD students.

AISD existing sites can be used for the F.A.S.T Centers.
F.A.S.T Center

Stadiums @ F.A.S.T Centers

Demolition or Renovate existing stadiums.

Provide 12,000-15,000* seat stadiums. Varying in size due to existing conditions.

The new Stadiums will bring in outside revenue.

Marketing opportunities, such as marketing boards
F.A.S.T Center
Example on an existing site

Seating for 12,000-15,000 spectators.
Depends on existing site conditions.

Fitness Center Additions to the site, as well as a swim center.

Indoor Sports Arena to replace existing arena.

Fitness Center & Sports Arena for Student use as well as Community.

Marketing boards build business relationships
WELLNESS CENTERS @ CAMPUSES

Wellness Center could serve as regional facilities as long as they have fields, until all phases of the long range plan are met.

Athletics & Wellness Centers to be at all high school campuses, to support all campus athletics.

Phased approach starts with Austin High, Bowie, Lanier, and LASA, to align with FMP.

Wellness Centers consist of new construction to provide a 50 year life span.
WELLNESS CENTERS @ CAMPUSES

PARTNERING OPPORTUNITIES

Wellness Centers will allow business partnership at a neighborhood level.

Community use of facilities after hours. To be monitored by partnerships will outside business relationships.

These facilities provide opportunities for rental spaces, & community meeting space.

Efficient use of buildings and facilities.
Regional Stadiums at a Campus Level

Regional Stadiums will be strategically placed at existing campuses.

The goal is to have a total of 3 regional stadiums to support the F.A.S.T stadiums.

Each Regional stadiums will seat between 5,000-7,000 spectators.

Each regional stadium will have artificial turf field, lights and synthetic track. Locker rooms, appropriate concessions, and restrooms will also be included.
QUESTIONS?
The members of the Facility and Bond Planning Advisory Committee, under advice of the AISD Board of Trustees, are seeking to include robust language for strategic vision for the CTE Department in the next Facility Master Plan. As such, we have brainstormed several questions to spark our next conversation with the CTE Department. Your department is invited to join us for a 20-30 minute conversation at our FABPAC meeting on Wednesday, March 8th.

Strategic Vision:
- How do you see your department (and their related facility/capital needs) changing over the next 25 years? How would that 25-year change manifest over the next 5-10 years?
- What is the strategic vision for your department in the next 25 years - not just needs, but wants as well? What small steps, order of events, and timing would you anticipate occurring to realize the vision in 25 years?
- How does your vision/plans RE-INVENT/MODERNIZE your department/subject matter and facilities?
- Dream big. Once we can catch up on basic needs, what do you need? If you didn't have to worry about $, what would you want to see?
- If money were not a concern, what would be your dream ask?

Shared Facilities versus School-based facilities
- Given our huge district do you see mega-facilities for all to use or a more regional school-based approach? Why?

Public/Private Partnerships:
- Has your department initiated strategic conversations on public/private partnerships and do you have potential for outside funding and long-term sustainability outside of capital improvements (bond spend)?

CTE Department-Specific Questions:
- While HB 5 opens up new pathways to graduation through CTE, what are the next three CTE opportunities we should be pursuing based on student/industry needs?
- What are the linkages between Austin's prospective job opportunities and careers with AISD CTE programming/capital needs and how we can get funding or at least assure buy-in when we go out for bond $ (E.g. Health/science, tourism/food industry, music tech, programming)
● Please discuss the relative advantages/disadvantages to concentrating CTE at 2–4 regional "hubs" instead of dispersed throughout several HS campuses.

● For strategic planning, will the future of CTE be at campuses or at hubs? With additional transportation costs for hubs, which is more economical? How does the transition from campuses to hubs take place? How do we close down the campus locations to make sure we don't end up with both campuses and hubs? Can some equipment be moved from campuses to hubs for cost savings?

● What is the lifespan for CTE equipment? How often are refreshes necessary? Are there any ways CTE could make/recoup money - I've heard of schools building houses and auctioning them off. Buyer covers house transport fee and foundations too.

● How do you balance the CTE programming offerings across the district and how does the projected data support it?

● How are locations of CTE programs be more accessible/equitable in distribution across the city? Can schools request/bid on new programs such as P-Tech/H-Tech, etc.?

We don't require written answers to all of these questions, but any written response addressing the spirit of the questions will be valued. Please be prepared to discuss these questions at our next FABPAC meeting on March 8th.
FACILITIES AND BOND PLANNING ADVISORY COMMITTEE MEETING

STRATEGIC VISION STATEMENTS FOR ATHLETICS, CTE, & FINE ARTS
Austin ISD’s Department of Career and Technical Education believes in providing students with the academic knowledge and technical skills needed for successful, high paying careers. Regardless of what is in store for them after high school – a community college, a university, the military or a job – today’s CTE students are developing the skill and habits that will get them started on their career paths.

1. Build flexible, specialized Career Centers, that are conveniently located in two regions of the District to provide increased access to CTE program space that can adapt to the inevitable changing CTE curriculum in the next 25 years. These facilities assist in achieving the AISD Core Belief 1. that “all students will graduate college-, career-, and life-ready” and align with Core Belief 2. “that we are committed to strategically leveraging and utilizing our resources”.

2. Update existing high school labs and specialized CTE spaces to be in alignment with certifications and college credits to meet educational goals.

3. Engage in community partnerships to help build ownership of these programs in Austin ISD among internal and external stakeholders, as expressed in AISD’s Core Belief Three.
Stand Alone Career & Technology Education Centers

Due to growing costs, the Career Centers will allow AISD to regionalize the CTE center and provide the highest quality CTE experience for Students.

The goal is to have a total of 2 regional Career Centers, supporting the north and south High Schools.

Equipment heavy programs, such as Culinary Arts, Automotive, and Construction Trades in a single location assists building business partnerships.
Central Career Centers would cost less because equipment would not be spread across multiple sites.

Centralized facilities have more access to advanced equipment.

CTE centers would only move the equipment intensive classes like automotive, culinary, & IT. Other less equipment intensive classes like business, graphics ETC would stay at each campus.

CTE centers should simulate real life environments to better prepare students for careers.
Renovations of Existing Facilities

Renovate existing high school lab and CTE spaces to meet current need.

Current classes are being taught in portables and need permanent labs and teaching space.

Renovations would enhance marketability of AISD schools and promote participation in these programs.

59% of AISD secondary students are enrolled in at least one CTE course
Priority Programs to include

- Robotics and STEM – engineering, design, modeling, prototype builds – computer and shop environments

- Automotive - includes Automotive Collision Repair as well as Automotive Technology.

- Culinary and Hospitality Services are combined with separate spaces.

- Criminal Justice/Law Enforcement - would include 1st responders, Fire fighters (Fire Academy), 911 call centers, homeland security, as well as, law enforcement

- Construction- would include Architecture Design (computer lab), all trades and some welding

- Health sciences - would be diverse, to include phlebotomy, bio med, dental, veterinary, as well as, health care/nursing
Auto Collision / Repair

This is a student training class, not a production shop. Materials will be accounted for only when and if it works into our training schedule.

BE CAREFUL

QUESTIONS?
The members of the Facility and Bond Planning Advisory Committee, under advice of the AISD Board of Trustees, are seeking to include robust language for strategic vision for the Fine Arts Department in the next Facility Master Plan. As such, we have brainstormed several questions to spark our next conversation with the Fine Arts Department. Your department is invited to join us for a 20-30 minute conversation at our FABPAC meeting on Wednesday, March 8th.

Strategic Vision:
- How do you see your department (and their related facility/capital needs) changing over the next 25 years? How would that 25-year change manifest over the next 5-10 years?
- What is the strategic vision for you department in the next 25 years - not just needs, but wants as well? What small steps, order of events, and timing would you anticipate occurring to realize the vision in 25 years?
- How does your vision/plans RE-INVENT/MODERNIZE your department/subject matter and facilities?
- Dream big. Once we can catch up on basic needs, what do you need? If you didn't have to worry about $, what would you want to see?
- If money were not a concern, what would be your dream ask?

Shared Facilities versus School-based facilities
- Given our huge district do you see mega-facilities for all to use or a more regional school-based approach? Why?

Public/Private Partnerships:
- Has your department initiated strategic conversations on public/private partnerships and do you have potential for outside funding and long-term sustainability outside of capital improvements (bond spend)?

Fine Arts Department-Specific Questions:
- Would you agree with the priority of the current departmental capital needs projects as suggested by the prior director? When should we consider another school-attached Performing Arts Center in the south?
- What is current appetite /interest for a performing arts center that is more south or central? Better access for the entire community.
- What needs do you have that relate to shared facilities, rather than ones that could/should be a part of campus modernizations? Please prioritize top needs for
on-campus and shared facilities. (We have trouble identifying whether there are shared needs that are more urgent than local improvements, such as for Lamar and Covington Fine Arts Academy supports, etc.

- Can our Fine Arts spaces be better utilized/rented when not in use by AISD?
- Our FAAs of AISD have been and continue to be outstanding and growing. I know that at schools such as MAC and Lamar the facilities do not match the talent in teaching and of the students. Because they are part of my vertical team, I know what the wants/needs are for those schools, and from FABPAC have heard the needs throughout the district. I would like to know if the department agrees with such, and if not, how would their vision differ in regard to all of AISD fine arts. I would also like to see what their "pie in the sky" desire for our fine arts to look like in the near and distant future.
- Are additional PACs needed and if so where? What is the SOP for elementary and middle school performances - should they be at their high school? Should there be a middle school in each quadrant with accommodating performance space.
- What is the Fine Arts thinking for programs and facilities for schools south of the river?

We don’t require written answers to all of these questions, but any written response addressing the spirit of the questions will be valued. Please be prepared to discuss these questions at our next FABPAC meeting on March 8th.
FACILITIES AND BOND PLANNING ADVISORY COMMITTEE MEETING

STRATEGIC VISION STATEMENTS FOR ATHLETICS, CTE, & FINE ARTS
FINE ARTS STRATEGIC VISION
The Austin ISD Fine Arts Department believes that a fine arts education is essential for the development of the whole child. The arts provide students with unique experiences that allow them to explore their passions, maximize their creativity and critical thinking skills, and learn valuable lessons about self-motivation, dedication, team work, and communication.

1. Create a new performing arts center in the south of the District to provide increased regional access to performance spaces for AISD students. This better accomplishes the goals of the Fine Arts Department and Creative Learning Initiative in Austin ISD to provide a quality arts-rich education for each child in AISD and to foster community collaborations and support for whole student development. The PAC is also used as a district professional development venue, and accepts outside rentals to gain revenue, when not being used for fine arts rehearsals, exhibits and performances.

2. Update existing performing arts spaces at campuses to create equitable access for all AISD students. This supports access to arts education for each child.

3. Create fine arts academies on select campuses for students to have the opportunity to pursue unique experiences in arts-rich education that will better prepare students to pursue the arts in higher education and beyond. These programs support developing students with knowledge and skills necessary for cognitive, creative, emotional and social growth as expressed in the Fine Arts Department vision.
Regional Performing Arts Centers

Providing a Performing Arts Center in the South will create opportunities for the entire district.

Current scheduling for the existing PAC is challenging due to the high demand.

A new center increases availability for students and community use.

Provides professional environment for training of students for careers or future schooling.
Renovations of Existing Campus Facilities

Renovations would enhance marketability of AISD schools and promote participation in these programs.

Renovations at existing campuses allow the department to bring current technology and fulfill the educational vision to meet student needs.

Completing the rigging repairs, as described in the fact sheets, is the most pressing need at this time.
Renovations of Existing Campus Facilities

Provide dedicated Art and Music rooms at Elementary Schools throughout the district.

Construct additional practice rooms & dedicated rehearsal and production spaces at multiple campuses district-wide.

Renovate & expand current performing art spaces at various campuses.
**Renovations of Existing Facilities**

Invest in upgrades and purchasing new equipment for each Fine Arts discipline.

Examples could include new instruments, kilns, sound/light boards, and ballet bars.

Provide student access to up-to-date technology and fully functioning equipment in pursuit of a Fine Arts education.
**Fine Arts Academies**

Provide Fine Arts Academies throughout the district.

Fine Arts Academies will be at all school levels. Blackshear Elementary, Campbell Elementary, Covington Middle School, Lamar Middle School, & McCallum High School.

Academies provide the opportunity for specialized spaces such as dance, orchestra, and arts.
QUESTIONS?
The members of the Facility and Bond Planning Advisory Committee, under advice of the AISD Board of Trustees, are seeking to include robust language for strategic vision for the Technology Department in the next Facility Master Plan. As such, we have brainstormed several questions to spark our next conversation with the Technology Department. Your department is invited to join us for a 20-30 minute conversation at our FABPAC meeting on Wednesday, March 8th.

Strategic Vision:
- How do you see your department (and their related facility/capital needs) changing over the next 25 years? How would that 25-year change manifest over the next 5-10 years?
- What is the strategic vision for you department in the next 25 years - not just needs, but wants as well? What small steps, order of events, and timing would you anticipate occurring to realize the vision in 25 years?
- How does your vision/plans RE-INVENT/MODERNIZE your department/subject matter and facilities?
- Dream big. Once we can catch up on basic needs, what do you need? If you didn't have to worry about $, what would you want to see?
- If money were not a concern, what would be your dream ask?

Shared Facilities versus School-based facilities
- Given our huge district do you see mega-facilities for all to use or a more regional school-based approach? Why?

Public/Private Partnerships:
- Has your department initiated strategic conversations on public/private partnerships and do you have potential for outside funding and long-term sustainability outside of capital improvements (bond spend)?

Technology Department-Specific Questions:
- Knowing that tech changes rapidly (usually to smaller, portable form factors), how does that affect departmental planning strategy?
- How can we best connect the vision to current and future workforce needs... preparing our students throughout their time at AISD with eye on the skills needed.
- How can we prepare for both technical careers and basic technology foundation for students who pursue non Tex careers.
● What is technology infrastructure vision at elementary and middle schools so we form good foundation for the future -- gain interest earlier in technical careers (especially more girls)

● To what degree does it make sense to "overbuild," for example, to accommodate more bandwidth than is currently necessary in anticipation of future demand growing?

● How closely do we monitor investments in hardware, versus cloud other technology, so as not to have hardware that quickly becomes outdated? Does potential loss of E-rate funds adversely affect pending AISD needs?

● Please be involved with the ed specs to incorporate all wants/needs including gathering space where students can utilize wifi during off hours if it is not available at home. Also, please continue to plan how AISD can help provide internet at homes or hubs to allow lower income students to make use of the technology we plan to provide. This needs to be rolled out simultaneous to the technology for each student so there isn't a gap in student's ability to utilize technology AISD is purchasing.

We don’t require written answers to all of these questions, but any written response addressing the spirit of the questions will be valued. Please be prepared to discuss these questions at our next FABPAC meeting on March 8th.
“We have brainstormed several questions to spark our next conversation with the Technology Department.”

So far, so good...
How do you see your department (and their related facility/capital needs) changing over the next 25 years? How would that 25 year change manifest over the next 5-10 years?

What is the strategic vision for you department in the next 25 years not just needs, but wants as well? What small steps, order of events, and timing would you anticipate occurring to realize the vision in 25 years?

State of technology in 2042 | Future Forecast

TECHNOLOGY FORECAST 2042

TECHNOLOGY RELEASES FOR 2042

In 2042, a number of technology breakthroughs and trends will become available to the public, for example:

- World sales of electric vehicles reaches 21,086,687
- Number of Internet users worldwide reaches 5,049,000,000

Technology related predictions due to make an impact in 2042 include:

- 'Society and the hybrid generation: Future of Computers P4'
- The slow death of the carbon energy era: Future of Energy P1

Related technology articles for 2042:

- Autonomous passenger drones are not Sci-Fi anymore
- Finding other habitable planets in the universe
- Shapeshifting building material that reacts to rain
- The future of military cloaking devices

Technology related podcast episodes that cover trends in 2042:

- What humans will evolve into | Life in 2030 podcast | S1:E1

NEXT SCHEDULED UPDATE FOR THIS FUTURE TIMELINE
Moreover, centennials' minds are becoming less able to explore complex topics and memorize large amounts of data (i.e. traits computers are better at), whereas they are becoming far more adept at switching between many different topics and activities, and thinking non-linearly (i.e. traits related to abstract thought that computers currently struggle with).

These findings represent substantive changes in how today's children think and learn. Forward thinking education systems will need to restructure their teaching styles to take advantage of Centennials' unique cognitive strengths, without bogging them down in the rote and obsolete memorization practices of the past.
A range of groundbreaking life extension drugs and therapies will enter the market that will not only increase the average person's life expectancy but also reverse the effects of aging. Some scientists in this field are predicting that those born after 2000 may become the first generation to live until 150 years.

The average person living until 150 may have to work into his or her 100s to afford retirement. And during that stretch of time, entirely new technologies, professions, and industries will arise forcing people to enter a state of constant learning. This may mean attending regular classes and workshops to keep existing skills current or going back to school every few decades to gain a new degree.
The return of the trades

- **Infrastructure Renewal:** A great deal of our roads, bridges, dams, water/sewage pipes and electrical network was built more than 50 years ago.

- **Climate Change Adaptation:** Infrastructure in much of the world will need to be upgraded to prepare for these environmental extremes.

- **Green Building Retrofits:** Governments will attempt to combat climate change by retrofitting our current stock of commercial and residential buildings to make them more efficient.

- **Next Generation Energy:** Much of the world will have to replace its aging energy grid and power plants. Energy infrastructure will be replaced with cheaper, cleaner, and energy maximizing renewables, connected by a next-generation smart grid.
Since the early 1970s until today (2016), income growth for the bottom 90% of Americans has remained **largely flat**. Meanwhile, inflation during that same period has exploded with consumer prices increasing **roughly 25 times**. Today the level of wealth inequality, both in the US and the world, is reaching **dangerous heights**. This rising inequality is pushing those with means (or access to credit) towards ever greater levels of education to climb the economic ladder but even that might not be enough.
Higher education is key to escaping the poverty trap. However, while access to higher education has become more democratized over these past few decades, there remains a kind of "class ceiling" that's beginning to lock in a certain level of social stratification.

Hiring managers at leading US consulting agencies, investment banks, and law firms tend to recruit most of their hires from the nation's top 15-20 universities. Test scores and employment history rank near the bottom of hiring considerations.

Given these hiring practices, future decades may continue to see an increase in societal income inequality, especially should the majority of Centennials and returning mature students be locked out of the nation's leading institutions.
According to a recent Oxford report, 47% of today's jobs will disappear by the 2040s, largely due to machine automation. In some cases, entire professions will disappear, in others, technology will improve a worker's productivity to a point where you simply won't need as many people to get a job done. This is referred to as structural unemployment, where job losses are due to industrial reorganization and technological change.

Except for certain exceptions, no industry, field, or profession is entirely safe from the forward march of technology. And it’s for this reason that reforming education is more urgent today than it’s ever been. Going forward, students will need to be educated with skills computers struggle with (social skills, creative thinking, multidisciplinarity) versus those where they excel (repetition, memorization, calculation).

• Facilitates research and content delivery.

• Supports ideation, creation, and iteration.

• Serves as a stage for demonstration of mastery and as a publishing platform.

• Solves learner challenges, such as language, special education, location, or time.

• Improves equity, in technology access and in general.
The vision of the Austin ISD Athletics Department is to instill a passion for lifelong learning in all Student-Athletes through the development of the athletic programs at the High School, Middle School, and Elementary level. The mission is to create an environment that fosters mutual respect, integrity, quality, and a commitment to excellence, through competitive athletics that instill the lifelong values of teamwork, leadership, and sportsmanship in the Student-Athlete so that they may be productive members of society.

Departmental Meeting

Initial Meeting: June 23, 2016
Departmental Contributors
• Leal Anderson

Follow Up Meeting: November 7, 2016

Departmental Needs
• Improve and modernize press boxes at centralized facilities.
• Add a competition basketball gym at Anderson High School.
• Scrape and rebuild concession stands at Burger Center, Nelson Field, and House Park.
• Install field turf at softball and baseball facilities at Burger Center and Noack Sports Complex.
• Install security improvements at Burger Center and Noack Sports Complex.
• Upgrade and improve weight rooms, fields, tracks, and HVAC systems at various campuses.

Estimated Cost of Departmental Needs (Hard Dollars Only)
$79,800,000

| ATH-20     | Press Box Improvements at House Park | • Modernize press box  
• Size needs to be 3 times as large as current press box  
• Project Defined Previously - ADA, walk up stairs, elevator required  
• 3 levels needed instead of 2 | House Park | High | Immediate | $4,000,000 | Deficiency | 1.2 | Facility Condition Assessment | Needs Further Consideration from FABPAC and Staff | Yes |
| ATH-34     | Press Box Improvements at Centralized Facilities | • Improvement at press boxes for both baseball and football  
• 2 levels to 3 levels  
• Double floor plate | Burger Center | High | Immediate | $3,800,000 | Deficiency | 2.2 | Facility Condition Assessment | Needs Further Consideration from FABPAC and Staff | Yes |
| ATH-33     | Press Box Improvements at Centralized Facilities | • Improvements at press boxes for both baseball and football  
• 1 football field, 1 baseball field  
• Nelson (structure)  
• ADA  
• Needs to be twice the size  
• 2-stop elevator | Nelson Field | High | Immediate | $2,400,000 | Deficiency | 2.2 | Facility Condition Assessment | Needs Further Consideration from FABPAC and Staff | Yes |
| ATH-12     | Scoreboard Replacement at Nelson Field | • Baseball  
• Football  
• Softball | Nelson Field | Medium | Near Future (< 5 years) | $4,200,000 | Ask | 2.4 | Departmental Project | Needs Further Consideration from FABPAC and Staff | Yes |
| ATH-11     | Scoreboard Replacement at Burger Center | • Baseball  
• Football | Burger Center | Medium | Near Future (< 5 years) | $3,100,000 | Ask | 2.4 | Departmental Project | Needs Further Consideration from FABPAC and Staff | Yes |
| ATH-13     | Scoreboard Replacement at House Park | • Football  
• Memorial scoreboard | House Park | Medium | Near Future (< 5 years) | $2,300,000 | Ask | 2.4 | Departmental Project | Needs Further Consideration from FABPAC and Staff | Yes |
| ATH-36     | Ann Richards YWLA Improvements | • Discus cage, shot ring, high jump area and track (400M)  
• Renovate full locker room and expand if space is available  
• Gym floors redone  
• Repair bleachers and AC  
• Softball Field | Ann Richards YWLA | Medium | Near Future (< 5 years) | $1,700,000 | Deficiency | 2.4 | Facility Project | Needs Further Consideration from FABPAC and Staff | Yes |
| ATH-48     | Austin HS Improvements | • Field and light improvements  
• Track improvements  
• Locker room renovation and expansion  
• Weight room  
• Demo interior space and renovate | Austin High School | Medium | Near Future (< 5 years) | $1,500,000 | Deficiency | 2.4 | Facility Project | Needs Further Consideration from FABPAC and Staff | Yes |
| ATH-28     | Replace Track at Burger Center | • Replace track | Burger Center | High | Immediate | $600,000 | Deficiency | 2.4 | Facility Project | Needs Further Consideration from FABPAC and Staff | Yes |
| ATH-47     | Noack Sports Complex Drainage Improvements | • Flooding occurs and transmits sediment into dugout  
• Frequent maintenance required to repair field  
• Rehab the field and install berm or French drain | Noack Sports Complex | High | Immediate | $400,000 | Deficiency | 2.4 | Facility Project | Needs Further Consideration from FABPAC and Staff | Yes |
| ATH-35     | Burger Center Restroom Renovations | • Original restrooms in place  
• Maintain sq. footage  
• 2 Men’s and 2 Women’s facilities | Burger Center | High | Immediate | $200,000 | Deficiency | 2.4 | Facility Condition Assessment | Needs Further Consideration from FABPAC and Staff | Yes |

</table>
Campus Support designs and implements projects that are funded through the district’s maintenance and operations budget. Each spring, school principals submit facility needs through the district’s Work Order system for consideration. The Board approves contracts that cost $50,000 or above. During the summer, improvements are made to schools that directly impact the students’ learning environment, including but not limited to new flooring, resurfacing of wood gymnasium floors, replacement of blinds, roofing repairs, HVAC repairs and drainage system improvements. Campus Support project managers and contractors work feverishly to complete work and have campuses ready for the start of school.

**Departmental Meeting**

*Initial Meeting: July 7, 2016*

**Departmental Contributors**
- David Downing
- Terry Turnipseed
- Bob Ross
- Smith Holt

**Departmental Needs**
- Approximately 50% of roofs are in need of maintenance, resurfacing or full replacement.
- Installation of crawl space improvements (drainage systems, access, lighting, ventilation, etc.)
- Repair failing bleachers to prevent full replacement that will cause a loss in capacity.
- Implement mechanical treatment systems, as appropriate.
- Implement separation of HVAC systems for Libraries, Locker Rooms and Gyms.

**Estimated Cost of Departmental Needs (Hard Dollars Only)**

$78,200,000

This cost assumes the mid-point of any individual item that has a range of costs.

The Department of Comprehensive Health Services is under the Office of SEL and Multi-Tiered Systems of Support and provides programs, services, initiatives, and resources for campuses, staff, students, and families. Such programs include: the Department of Student Health Services through Dell Children’s Medical Center and Seton Healthcare Family, mental/behavioral health services through partnerships with Vida Clinic and Austin/Travis County Integral Care, the Department of Vision and Hearing, School Health Advisory Council, and integrated case management in collaboration with the Family Resource Centers. Additionally, the Department of Comprehensive Health Services provides direction to campuses regarding food/nutrition policy, food allergy and anaphylaxis healthy snack vending through Healthy Vending by HUMAN, first-aid/AED/CPR training and compliance, and mental health/stress management/trauma informed care training for AISD staff.

Departmental Meeting
Initial Meeting: January 19, 2017

Departmental Contributors
• Tracy Spinner
• Cicely Bega

Departmental Needs
• Need adequate space at all schools to provide services.
• Health Room expansions/renovations are needed in various schools across the district.

Estimated Cost of Departmental Needs (Hard Dollars Only)
$1,050,000

| HLTH-01  | Health Room Expansion and/or Renovations | • Renovate or expand health rooms at schools that are undersized or in poor condition  
• High Schools: Lanier  
• Middle Schools: Webb, Lamar, O.Henry  
• Elementary Schools: Kiker, Rodriguez, Lee, Pillow, Mathews, Gullett, Blanton, Ortega, Doss, Brooke | Multiple Identified | High                   | Future (5-10 yrs.) | $1,050,000           | Deficiency        | 2.4            | Facility Project | Necessary - Near Future | Yes, Consider Implementing During Modernization |
Austin ISD’s Department of Career and Technical Education (CTE) believes in providing students with the academic knowledge and technical skills needed for successful, high-paying careers. Regardless of what is in store for them after high school – a community college, a university, the military or a job – today’s CTE students are developing the skill and habits that will get them started on their career paths. AISD and Austin Community College are in partnership to ensure that students have opportunities to take technical courses that provide them with 21st century knowledge and skills to compete in a global society.

Departmental Meeting
Initial Meeting: July 14, 2016
Departmental Contributors
• Annette Gregory
• Jill Ranucci
• Mary Angel
• Tammy Caesar
• Latasha Wilson

Follow Up Meeting:
November 8, 2016

Departmental Needs
• Update and remodel Automotive Shop at Reagan High School to accommodate increasing student numbers and student sharing.
• New CTE Building needed for LASA and LBJ High School CTE teachers.
• Provide Arts, AV, Studio space, and safe places to arrange and maintain equipment at McCallum High School.
• Various CTE space improvements at various campuses district-wide.
• Develop District Agriculture Project Center

Estimated Cost of Departmental Needs (Hard Dollars Only)
$148,700,000

The Austin ISD Fine Arts Department believes that a Fine Arts education is essential for the development of the whole child. The arts provide students with unique experiences that allow them to explore their passions, maximize their creativity and critical thinking skills, and learn valuable lessons about self-motivation, dedication, team work, and communication.

AISD is a recognized leader in urban education and is dedicated to providing an arts-rich education for every student. In 2015-16, Fine Arts education was available at all 129 schools serving all of the district’s 86,000 students.

The mission of the AISD Library Media Services and each school’s librarian is to ensure that students, teachers, administrators, and staff are effective users of ideas and information. This mission is accomplished by the following:

- Providing intellectual and physical access to materials in all formats;
- Providing instruction to foster competence and stimulate interest in reading, viewing, and using information and ideas;
- Collaborating with other educators to plan, design, teach, and evaluate information literacy learning experiences to meet the needs of all students;
- Demonstrating effective leadership strategies in the administration of the program and in making connections to the broader learning community.

Departmental Meeting
Initial Meeting: July 13, 2016
Departmental Contributors
- Elizabeth Polk

Follow Up Meeting:
November 8, 2016

Departmental Needs
- Upgrade technology and storage space in various campus libraries.
- Repair issue at Rodriguez Elementary School where drainage is coming into library from the courtyard.
- Expand libraries at facilities determined to be undersized.
- Replace existing library book detection systems at Middle Schools and High Schools.
- Improve media spaces at various campuses identified.

Austin ISD’s Police Department establishes a safe and secure environment for our future leaders to learn, grow, and succeed inside and outside of the classroom. The Department provides general law enforcement, security, and safety services at AISD and is divided into five bureaus, including: Administrative Services (Data Processing); Emergency Management (Mitigation, Preparedness, Response, & Recovery); Life Safety Systems (Alarms, Fire Suppression Systems, Card Access) Special Operations (Investigations, Training/Courier, Technology, & Dispatch); Uniform Services (School Resource Officers (SROs) & Patrol)

Departmental Meeting

Initial Meeting: July 11, 2016

Departmental Contributors
- Christian Evoy
- Eric Mendez
- John Goode

Departmental Needs
- Upgrade and replace radios based on end of life expectancy.
- Upgrade digital recording system due to current system being obsolete.
- Install secondary dispatch console to allow for more frequencies and better communication amongst officers.
- Upgrade servers for Life Safety and Police systems.
- Replace current Records Management System (RMS).
- Independent police facility with easy access for officers and an interview room.

Estimated Cost of Departmental Needs (Hard Dollars Only)

$15,550,000

Contract and Procurement Services is responsible for the acquisition and distribution of goods and services throughout the District while complying with state and federal law and maintaining the utmost transparency.

Our mission is to provide the highest level of customer service to AISD’s campuses and departments by providing guidance and processing procurement transactions in a timely manner. We strive to ensure the District is receiving the best value and quality through competitive bidding, product specification and the creation of strategic partnerships. We work as expenditure managers and assist the schools and departments with the spending of their funds, which results in roughly $140 Million in purchases annually.

The Austin ISD Science Curriculum Department works to design and disseminate engaging, authentic, and accessible science curriculum for a highly diverse student population. Our goal is not to factory-assemble scientists, but rather to craft science citizens who are knowledgeable and considerate of the processes that affect our world. To that end, we promote classroom and outdoor investigations to instill critical thinking and awareness, and integrate technology to promote information and media literacy.

In partnership with parents and the community, AISD exists to provide a comprehensive experience that is high quality, challenging, and inspires all students to make a positive contribution to society.

Departmental Meeting

Initial Meeting: August 30, 2016

Departmental Contributors
- Jean Bahney
- Mike Thomas
- Elizabeth Dickey
- Ron Olson
- Virginia Haas
- Nancy Gorton
- Bonita Homer
- Diana Vallejo

Follow Up Meeting: November 8, 2016

Departmental Needs
- Replace Rosedale School as facility does not serve the students well.
- Revise Education Specifications regarding residential laundry facilities, room with visual alarms acoustical separation and braille signage.
- Improve SPED rest room facilities at Kealing Middle School.
- Expand SPED space due to overcrowding at identified campuses in the district.
- Dedicate space for a Dyslexia Academy to teach students and train teachers.

Estimated Cost of Departmental Needs (Hard Dollars Only)

$23,900,000
