## How Can We Meet the Needs of All Students?

### High Expectations

- All students can AND will learn, engaging in their passions.
- Must be clear so that all students understand exactly what is expected from them.
- Work with students to develop goals that align with class expectations.

### High Support

- All students should be allowed to meet standards at their own pace. Some students may require more or less time.
- Let students know that you will be with them to help at every step as they work toward goals.
- Provide the necessary level of modifications/accommodations to help each student find success.

# Centering Equity by Design

### What's the problem?

Understand the issues, especially those of our historically underserved students and communities.

### Why did it happen?

Identify the root causes by looking at the systems beneath the surface. In order to prevent problems from returning, deeper examination is necessary.

### What will be done and how?

Develop goals (a vision of a destination) and strategies (a method of how to achieve the goal).

### How will we make sure the work gets done?

District leadership will be responsible and accountable for implementing strategies that are within their purview and for periodically reporting out publicly on their progress. Additionally, bond projects are monitored by the Community Bond Oversight Committee.

### How are strategies prioritized?

Develop an equity-based “decision-making framework,” to evaluate recommendations—providing transparency on how decisions are made.

# Research behind the Activity

## CDC Social Determinants of Health Framework

The Social Determinants of Health is a framework that views an individual's well-being from a holistic lens, including a variety of factors that impact well-being. Education is a key determinant within that framework, as it impacts a child's well-being and success. We know that access to quality education is critical to a student's ability to thrive, but students in AISD do not have equitable access to the resources they need to succeed. We are looking at a comprehensive network of resources that are crucial- whether through the district or partnership with other organizations - in cultivating student well-being and success.
