

Long-range Planning Committees Workgroups

The LPC workgroups are a subset of the committees that work outside committee meetings to dive deeper into specific areas of the long-range planning process. We've made that work available for the community to see in real time to increase transparency. Click the links below to see their working documents along with any resources that support their work.

Problem Statements and Root Causes Workgroups

Over the last several months, the planning committees have been assessing information, data, and feedback from community members, students, staff, and parents. The Committees have developed several problem statements that outline some of the current issues the district needs to address. They then assessed the causes underlying the problems to understand why these unmet needs are occurring. The below work groups are working on refining the problem statements and diving deeper into the root cause analysis that took place during the committee meetings.

Decision-making Framework Workgroup

This workgroup is drafting a decision-making framework which will be used to prioritize goals and strategies. This tool will be passed on to the Bond Steering Committee to prioritize investments.
