

Educational Suitability Summary Report

Pickle Elementary School

Date: 01/05/2021 Score 68% Satisfactory

Pickle Elementary School, serving an enrollment of approximately 445 students in northeast Austin, is known for its close ties to the St. John Community Center. Included on the 16.6 acres campus through a joint use agreement with the City of Austin are a community center, community clinic and public library. The school was constructed in 2001 and shares several key spaces with the community center. The shared resources mean that the campus and gym are quite large in comparison to other elementary schools in the district.

The school offers pre-K, dual-language and after-school programs. Studios are spacious, with high ceilings and clerestory daylighting. The spaces have good control of temperature and lighting for occupant comfort. Most of the school is arranged with studios along a hallway with limited transparency or breakout spaces. Two of the wings have a central learning neighborhood, although at the time of the assessment these were being used for storage.

Interview Overview

Principal Rosa Waters explained the importance that Pickle Elementary school has for the surrounding neighborhood. The school and community center are deeply rooted in the history of this community. In the main corridor of the building, historical artifacts are exhibited in large glass display cases built into the walls. Historical street names are cast into the floors to convey the history of the site.

The school sees its role as not just teaching students but educating the entire community. Principal Waters wants a large, flexible community room where the school can host events, classes or community meetings. Modern technology in the community room would be a key tool to help educate these families, as many of them have limited access or familiarity with technology. Improved technology infrastructure is needed, including better Wi-Fi and power distribution. The principal's office has very poor wi-fi signal. They would like to see future technology integrated into walls rather than bulky televisions on carts.

The school is proud of its outdoor learning spaces, and they are in the process of creating two additional seating areas for groups of 20-30 students. Many of these spaces could be improved with better shade cover and access to power and data. The outdoor learning spaces at the new science and maker wing function very well, with a large, covered area and direct access and visibility from the interior studios.

Educational Suitability Summary Report

Pickle Elementary School

Assessment Findings

The Educational Suitability Assessment of Pickle Elementary School earned a 68% overall score and places the campus in a category of Satisfactory. The assessment consists of seven General Building categories and seven Academic categories to determine areas that need more attention.

Average Categories (51-65%):

General Building

Score is average.

The school's unique arrangement with the attached community center offers numerous opportunities for shared resources. The gym and cafeteria can operate as part of the school or as part of the community center. School and community pride is conveyed through the exterior murals and vitrines found throughout the school. Unique art pieces convey historic construction and agriculture.

Security

Score is average.

Academics & Learning

Score is average.

Studios are well sized but have limited opportunities to support flexible learning spaces in multiple group sizes. Hallways do not have usable breakout spaces, and studios lack transparency to supervise learning outside of the studios.

Visual and Performing Arts

Score is average.

The stage in the gym is quite large and sophisticated for an elementary school. The art and music rooms nearby are well sized with good storage.

Media Resources

Score is average.

The library is near the main entry but has little visibility or signage. Community functions may be hosted in the branch library in the facility. The library is a single, large open space with different areas defined by furniture arrangements. No breakout areas are provided, and acoustical separation for different groups would be difficult.

Technology

Score is average.

Each studio is equipped with flat panel TVs on mobile carts, projectors and projector screens. Power distribution is limited, with only two outlets per wall. Mobile charging carts are present in the computer lab, but it is unclear how these are utilized on the campus.

Administration Spaces

Perkins&Will

Educational Suitability Summary Report

Pickle Elementary School

Score is average.

The administration space is well sized with ample natural light. There are no conference rooms in the office, but the offices offer good acoustic privacy.

Satisfactory Categories (66-80%):

Exterior

Score is satisfactory.

A small drop-off loop and canopy mark the main entry to the school. The analog monument sign is in good condition and easily visible from the street.

Outdoor Learning and Activity

Score is satisfactory.

The indoor-outdoor science studios are an excellent example of flexible learning spaces. Two studios connected with a sliding wall allow them to serve groups of various sizes. A transparent wall separates the studios from the fully covered outdoor space directly outside the two rooms. Learning gardens and playscapes are not in good condition. Playscapes are faded and the only shaded area is the paved court outside of the gym. The learning garden is spacious but is not well maintained. When it rains, water leaks from the garden space into the main office.

Environmental Quality

Score is satisfactory.

Acoustics and lighting in the studios are very good. Each room has windows at eye level, as well as a skylight that brings light down over the sloped ceiling.

Furniture, Fixtures, Equipment

Score is satisfactory.

Much of the furniture in the school is in good condition. Studios have loose tables and chairs that allow them to be rearranged for individual or group learning. Cafeteria offers numerous seating types, including outdoor dining options.

Food Services

Score is satisfactory.

Cafeteria is spacious with lots of natural light. The space has good visibility to the large outdoor dining area next to it. This outdoor area is fenced in and provides a variety of seating options.

Very Satisfactory Categories (81-100%):

Controllability of Systems

Score is very satisfactory.

Studios have individual thermostats to control temperature. Artificial lighting controls are excellent; all fixtures have two settings and dimming. All windows have blinds in good condition to control natural light.

PE and Wellness

Score is very satisfactory.

The gym is a shared amenity for the community center and the school. It is quite large for an

Educational Suitability Summary Report

Perkins&Will

Pickle Elementary School

elementary school, with bleachers, stage and adjustable hoops. The size and number of windows bring lots of natural light into the space and make it feel even larger.

Pickle Elementary School

Exterior: Monument sign and building entry.

General Building: Main building corridor with ramps and stairs to accommodate grade change.

Pickle Elementary School

Academics and Learning: Windows and skylight help bring lots of daylight into studios.

Media Center: Flexible and stackable furniture gives ability to reconfigure the library.

Pickle Elementary School

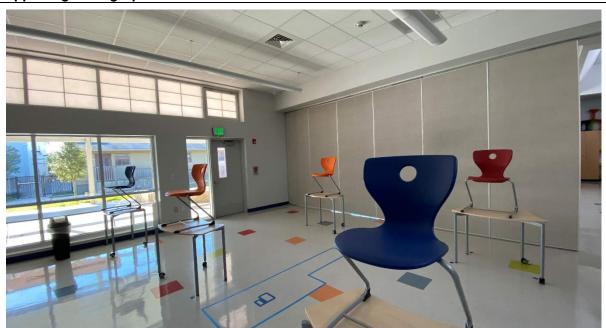

Supporting Photographs

Academics and Learning: Breakout space between studios used as storage. Storage appears to be an issue. This could be an outcome of COVID-19 protocols and does not necessarily reflect a normal school year.

Academics and Learning: Computer lab is in very good condition with mobile charging carts.

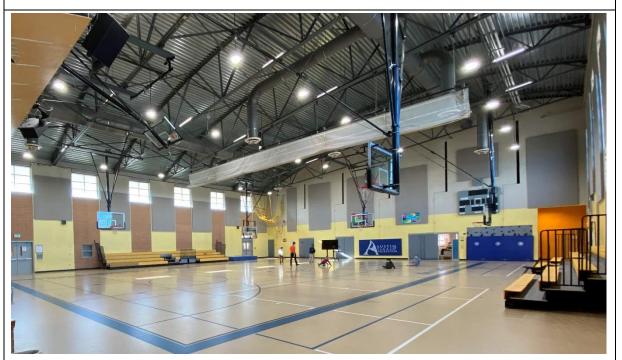

Academics and Learning: Science Studio with moving wall and views to outdoor studio.

Outdoor Learning and Activity: Covered outdoor studio outside of flexible science studio.

Food Services: Large cafeteria with good natural light connected to outdoor dining as well.

PE and Wellness: Large gym with bleachers and adjustable basketball hoops.

Outdoor Learning and Activity: Playscape is faded and lacks a shade canopy.

Outdoor Learning and Activity: Learning garden with compost and cisterns.
