

Educational Suitability Summary Report

Williams Elementary School

Date: 01/21/2021

Score 48% Unsatisfactory

Williams Elementary School, serving an enrollment of approximately 415 students, is in southeast Austin. It was built in 1976 and consists of approximately 64,000 SF on nearly 14 acres. The school is known for its two-way bilingual, AVID, creative learning initiative, social and emotional learning, and early childhood development programs.

Since the school was constructed in the mid-70's, separate studios have been created within the footprint of the original open concept plan. The typical layout is a cluster of four studios connected by an opening in the walls with no doors. Some studios can only be accessed by entering through another studio. There are some attached rooms that could function as small group spaces, but they are currently used as storage space. The open concept contributes to a lack of acoustic privacy. Many of the interior studios also lack direct access to natural light due to the layout.

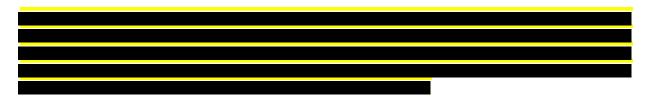

The special education studios have many deficiencies. They lack an ADA-compliant restroom, space for a changing table and a washer and dryer. The campus also lacks developed outdoor learning spaces.

Interview Overview

An interview was held with Principal Natalie Cardona-Villanueva on March 2, 2021. The open concept of the learning spaces is a significant issue. The lack of distinguished studio spaces allows students to be easily distracted. Their learning neighborhood layout does not work well.

The principal stated that there are programs that are not in suitable spaces. The music room has been repurposed as a fifth-grade studio. The music room has been relocated next to the main office and takes up two studio spaces separate by an old operable partition. The principal also noted that to space for janitorial staff, the school converted the gym restrooms into an office and storage space. The school utilizes several portables to house programs, including the parent support specialist, speech pathologists, diagnostician, social behavior skills, Busy Bee program, and science lab.

The exterior spaces on campus are important to the campus since the community uses the spaces as well. However, these spaces need further development with exterior furniture where students can sit and have a surface to write on. More covered/shaded areas are also needed.

Assessment Findings

The Educational Suitability Assessment of Williams Elementary School earned a 48% overall score and places the campus in a category of Unsatisfactory. The assessment consists of seven General Building categories and seven Academic categories to determine areas that need more attention.

Unsatisfactory Categories (36-50%):

Exterior

Score is unsatisfactory.

On the east side of campus, there is a minimal drop-off canopy. Parents picking up in separate areas with buses and pre-K mixing in the rear lot. The dumpsters are not easily accessible for trash/compost disposal. There are steps to access the dumpsters. They are far away in the parking lot and require crossing main vehicular circulation path.

General Building

Score is unsatisfactory.

Most interior corridors are somewhat narrow – less than 8 feet in width. The gym and cafeteria have ability to function for evening functions with limited access to the campus, but the entry is not apparent for visitors.

Environmental Quality

Score is unsatisfactory.

Studios are open to each other and can easily hear words and sounds from adjacent studios. Some studios open to a busy hallway with no barrier from the noise and traffic of the hallway. Many studios use the HVAC system for white noise. Due to the layout of studios, interior studios do not have windows and lack sufficient natural light.

Controllability of Systems

Score is unsatisfactory.

Studios are open to each other, so there is only one thermostat per zone, and the teachers cannot control the temperature. Lighting quality in the studios is with only alternating rows and insufficient for interior rooms that do not have the added natural light.

Academics & Learning

Score is unsatisfactory.

Studios are completely open to each other with no doors separating the spaces. Studios have small group rooms, but these are used for storage. The kindergarten and pre-K wing has an enclosed layout with a large common collaboration area. Special education spaces are configured with the open concept and the restrooms are not ADA compliant and lack a changing table, washer and dryer.

Food Services

Score is unsatisfactory.

Cafeteria is small with low ceilings and no access to natural light. The area lacks sufficient storage, and the kitchen area lacks an office.

PE and Wellness

Williams Elementary School

Score is unsatisfactory.

Gym is small with no natural light. The equipment appears to be original and in poor condition. Restrooms across the hall have been converted to storage rooms and offices.

Media Resources

Score is unsatisfactory.

Library is central in the building with no transparency. Signage is lacking to allow visitors to find it. There are no areas for quiet study or any breakout rooms. The furniture is heavy and not easily reconfigured.

Administration Spaces

Score is unsatisfactory.

Space is open and has some informal seating. Noise travels between offices and acoustic privacy is unsatisfactory. There is only one conference space down a corridor far from the administration office with limited transparency.

Average Categories (51-65%):

Outdoor Learning and Activity

Score is average.

The campus only has two gardens, and these need further development. Both are small with limited planting areas. The campus has one small cistern at the front of the campus, and another is connected to the roof of a portable.

Security

Score is average.

Furniture, Fixtures, Equipment

Score is average.

Furniture overall is not new, but in good condition. Most studios have individual desks and loose chairs and can be rearranged. Some studios have multiple chairs at a larger table with less flexibility for reconfigurations.

Visual and Performing Arts

Score is average.

Music room is in a small room with an operable accordion partition. The partition is not utilized in order to maintain a larger space. Music room is not near the performance stage and does not have a dedicated storage space. Stage space is shallow and lacks sufficient storage. The art room is well-configured with sufficient space, an attached kiln room and storage space.

Technology

Score is average.

Studios have a mixture of technology with some dating back to old televisions with VCRs. All studios have the updated mobile flat panel screens. Some walls in studios do not have any power or data
