

# AISD School Mental Health Centers

All AISD School Mental Health Centers (SMHCs) operate through an innovative collaboration between AISD Comprehensive Health and Mental Health and Vida Clinic. Each School Mental Health Center is staffed by full time licensed clinical therapists who provide individual, group and family counseling. All campuses offer bilingual services and work through a culturally inclusive lens.

All AISD School Mental Health Centers (SMHCs) provide clinical assessments, crisis support, family counseling, ongoing individual therapy, as well as collaboration with school staff and community providers.

All School Mental Health Centers provide services year-round. SMHCs will follow campus hours, with some flexibility to accommodate parents' schedules when possible.

For information on receiving services, contact your child's counselor or administrator. You may also contact the SMHC that is most convenient for your family. **Parental consent is required prior to receiving services.**
