

2010-2011 AISD Student Climate Survey Ann Richards High School

Research indicates that school climate can either be a positive influence on students' learning environment, or can serve as a significant barrier to students' learning. Indeed, elementary school teachers in Austin Independent School District (AISD) whose students provided positive ratings of behavioral environment, teacher support, adult fairness and respect, and academic self-confidence had students who made greater growth on TAKS in 2009-2010 than did their peers whose students rated school climate less favorably.*

The following tables show the total number of surveys students at Ann Richards returned in 2010-2011 (Table 1), the response rate by grade (Table 2), and the distribution of responses by race/ethnicity compared with the population (Table 3) for students at Ann Richards.

Table 1. Number of respondents for:	Ann Richards	All High Schools
# of surveys returned	444	8,315
# of students	526	14,040
% of students represented	84%	59%

Note. Population data reflect enrollment as of the PEIMS snapshot date in October 2010. Students' grade level and ethnicity were self-reported. The new "ethnicity/race" reporting allows for students to first choose their ethnicity (Hispanic/Latino or non-Hispanic/Latino) and then choose one or more of five race values.

Table 2. Response rate by grade for Ann Richards, 2010-2011			
grade	# of students	# of responses	response rate
6th grade	119	104	87%
7th grade	136	125	92%
8th grade	121	114	94%
9th grade	87	77	89%
10th grade	63	24	38%

Table 2. Distribution of responses by ethnicity/race for Ann Richards relative to Ann Richards's school population, 2010-2011		
Ethnicity	% of population	% of responses

Figure 1 depicts Ann Richards's average student climate survey ratings for 2010-2011, compared with average ratings across all High Schools in 2010-2011. Scores over 3.0 are desirable, as indicated by the green line. Please note the green and red text boxes that highlight the specific area in which Ann Richards most excels, as well as the area in which Ann Richards can improve most.

Figure 1. Student Climate Survey Subscales for Ann Richards and all High Schools, 2010-2011

Ann Richards's highest score on the 2010-2011 Student Climate Survey was for adult fairness and respect, which assesses the way teachers and other adults at your campus treat students. Research suggests that high levels of adult fairness and respect contribute to academic achievement. We encourage you to consider the ways your campus supports a respectful environment and share your best practices with others.

Ann Richards's lowest score on the 2010-2011 Student Climate Survey was for student engagement. This subscale measures the extent to which students enjoy their schoolwork and learning. We encourage your campus to improve the ways in which teachers provide instruction that is relevant and engaging for students.

The following pages contain more detailed information regarding Ann Richards's student climate results from 2008-2009 to 2010-2011. Please review the individual items on each subscale with particular attention to how Ann Richards's average ratings have changed or remained consistent over time. Please note that some subscales have changed from previous years, making longitudinal comparisons inappropriate for some items and subscales. For items and subscales where longitudinal data are available, statistically meaningful changes are flagged with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.

Subscale comparisons across years are no longer available due to the addition of items 29 and 30, which are from the Control subscale of the Tripod survey. The Tripod survey was developed by Ron Ferguson and has been administered to schools across the country over the last decade. The Tripod survey was used in the Gates Foundation's Measures of Effective Teaching (MET) Project. The survey is designed to assess the degree to which students agree with a variety of statements designed to measure the following dimensions: caring, captivating, conferring, controlling, clarifying, challenging, and consolidating. For more information, please visit: <http://www.metproject.org/partners#cambridge>. Response options for the Tripod items were changed to reflect the 1 = *never* to 4 = *always* scale.
