

2007-2008 AISD PARENT SURVEY RESULTS

CUNNINGHAM ELEMENTARY SCHOOL

The following report contains the results of the 2007-2008 AISD Parent Survey for your campus and all AISD schools at your level. The first section of this report provides a comparison of the campus demographics and the demographics reported by parents who responded to the survey from your campus. The next section describes the percentages of parents selecting specific responses for each survey item, and the final section indicates the actual number of parents who selected each response option. Campus survey results should be examined for areas of strength and opportunities for improvement. Results for all AISD schools at your level and longitudinal results for your campus are presented to provide references for comparison.

How many parents responded to the survey in 2007-2008, and how does this compare to the number of students in the population?

USING THE RESULTS OF THE AISD PARENT SURVEY

Please examine your results to determine areas of strength and opportunities for improvement. Areas of strength can be identified by large percentages of parents who “Strongly Agree” or “Agree” with a statement. Opportunities for improvement can be identified by large percentages of parents who “Disagree” or “Strongly Disagree” with a statement. In addition, please look for patterns in which one staff category consistently receives more positive or negative responses than other staff categories. This will help you to identify opportunities for praise and areas in which training may be necessary. If your campus percentages are very different from those reported by parents district-wide, please consider potential reasons for discrepancies.

It is important to look at the responses from year to year to determine whether there are any areas in which percentages have changed by more than a few points. Keep in mind that when response rates are low, the percentages may appear to fluctuate more without necessarily signaling a serious shift in perception. Please consider how representative your parent respondents are of the students in your school. Also, think about any changes in campus policies and practices that may have resulted in positive or negative changes. How can campus staff continue to support the positive changes? How might your staff address any undesirable changes that may have occurred? Because parental perceptions of treatment by school personnel are based on interactions with a variety of school staff, representatives from all areas should be included in discussions regarding school planning and improvement processes.
