

2011-2012 AISD Student Climate Survey International High School

Research indicates that school climate can either be a positive influence on students' learning environment, or can serve as a significant barrier to students' learning. Indeed, students attending high performing, higher economically disadvantaged schools reported higher ratings of behavioral environment, academic self-confidence, teacher expectations for student learning, and student engagement in 2010-2011 than did their peers at lower performing similar schools. Similarly, students attending high performing, less economically disadvantaged schools reported higher ratings of behavioral environment than did their peers at lower performing similar schools in 2010-2011.*

The following tables show the total number of surveys students at International returned in 2011-2012 (Table 1), the response rate by grade (Table 2), and the distribution of responses by race/ethnicity compared with the population (Table 3) for students at International.

Table 1. Number of respondents for:		All High Schools
	International	
# of surveys returned	104	11,197
# of students	146	16,183
% of students represented	71%	69%

Note. Population data reflect enrollment as of the PEIMS snapshot date in October 2012. Students' grade level and ethnicity were self-reported. The "ethnicity/race" designations allow students to first choose their ethnicity (Hispanic/Latino or non-Hispanic/Latino) and then choose one or more of five race values.

Table 2. Response rate by grade for International, 2011-2012

grade	# of students enrolled	# of responses	response rate
9th grade	87	74	85%
10th grade	59	16	27%
11th grade	n/a	n/a	n/a%

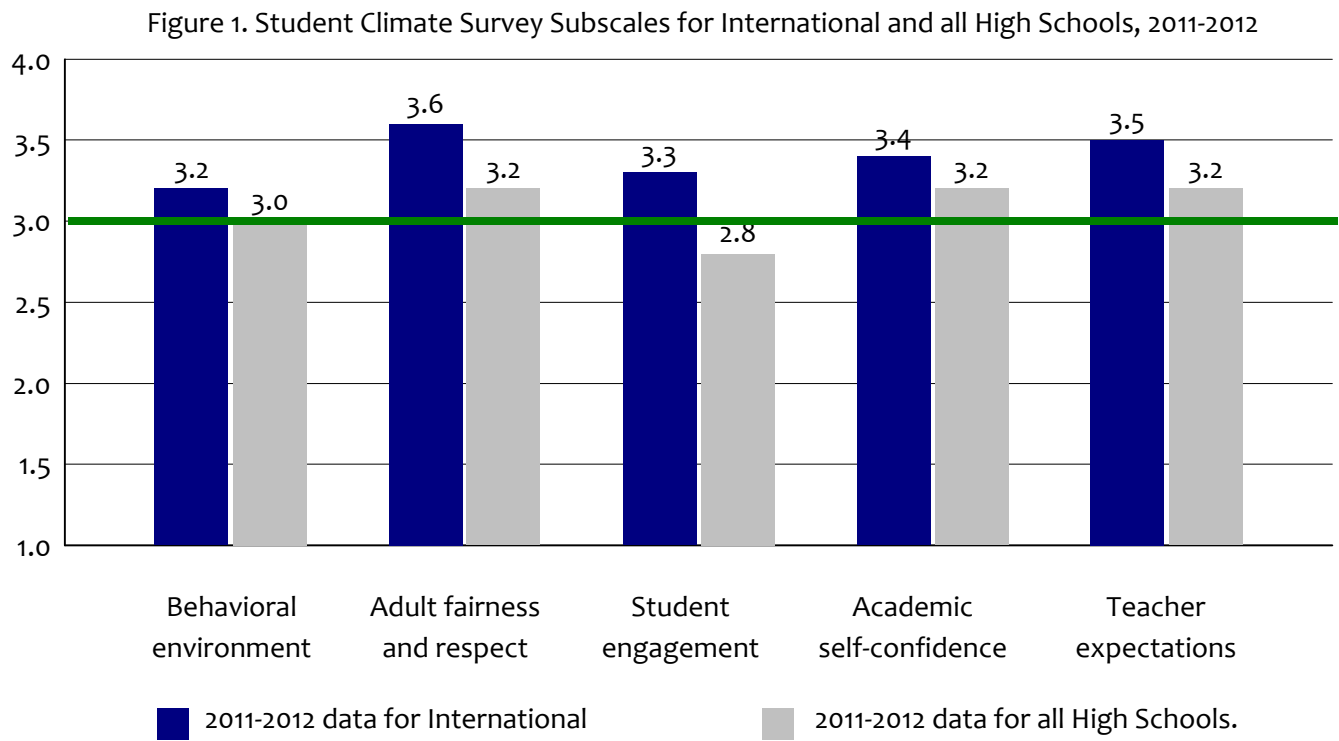

Table 3. Distribution of responses by ethnicity/race for International relative to International's school population, 2011-2012

Ethnicity	% of population	% of responses
Hispanic/Latino	70%	67%
Race		
American Indian/Alaskan Native	35%	4%
Asian	20%	21%
Black/African American	7%	7%
Native Hawaiian/Other Pacific Islander	%	0%
White	38%	14%

Figure 1 depicts International's average student climate survey ratings for 2011-2012, compared with average ratings across all High Schools in 2011-2012. Scores over 3.0 are desirable, as indicated by the green line. Please note the green and red text boxes that highlight the specific area in which International most excels, as well as the area in which International can improve most.

International's highest score on the 2011-2012 Student Climate Survey was for adult fairness and respect, which assesses the way teachers and other adults at your campus treat students. Research suggests that high levels of adult fairness and respect contribute to academic achievement. We encourage you to consider the ways your campus supports a respectful environment and share your best practices with others.

International's lowest score on the 2011-2012 Student Climate Survey was for behavioral environment, which measures the extent to which students respect each other, follow the rules, and feel safe at your campus. Higher ratings of behavioral environment have been associated with academic achievement. For resources on how to improve your campus' behavioral environment, please visit AISD's Child Study System website: <http://www.childstudysystem.com>

The following pages contain more detailed information regarding International's student climate results from 2009-2010 to 2011-2012. Please review the individual items on each subscale with particular attention to how International's average ratings have changed or remained consistent over time. Please note that some subscales have changed from previous years, making longitudinal comparisons inappropriate for some items and subscales. For items and subscales where longitudinal data are available, statistically meaningful changes are noted with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.
