

2010-2011 AISD Student Climate Survey Kealing Middle School

Research indicates that school climate can either be a positive influence on students' learning environment, or can serve as a significant barrier to students' learning. Indeed, elementary school teachers in Austin Independent School District (AISD) whose students provided positive ratings of behavioral environment, teacher support, adult fairness and respect, and academic self-confidence had students who made greater growth on TAKS in 2009-2010 than did their peers whose students rated school climate less favorably.*

The following tables show the total number of surveys students at Kealing returned in 2010-2011 (Table 1), the response rate by grade (Table 2), and the distribution of responses by race/ethnicity compared with the population (Table 3) for students at Kealing.

Table 1. Number of respondents for:		All Middle Schools
	Kealing	
# of surveys returned	810	10,939
# of students	1,225	15,194
% of students represented	66%	72%

Note. Population data reflect enrollment as of the PEIMS snapshot date in October 2010. Students' grade level and ethnicity were self-reported. The new "ethnicity/race" reporting allows for students to first choose their ethnicity (Hispanic/Latino or non-Hispanic/Latino) and then choose one or more of five race values.

Table 2. Response rate by grade for Kealing, 2010-2011			
grade	# of students	# of responses	response rate
6th grade	400	277	69%
7th grade	416	280	67%
8th grade	408	252	62%

Table 3. Distribution of responses by ethnicity/race for Kealing relative to Kealing's school population, 2010-2011		
Ethnicity	% of population	% of responses
Hispanic/Latino	34%	31%
Race		
American Indian/Alaskan Native only	20%	3%
Asian only	9%	11%
Black/African American only	16%	19%
Native Hawaiian/Other Pacific Islander only	0%	2%
White only	50%	55%
Two or more races	4%	10%

Figure 1 depicts Kealing's average student climate survey ratings for 2010-2011, compared with average ratings across all Middle Schools in 2010-2011. Scores over 3.0 are desirable, as indicated by the green line. Please note the green and red text boxes that highlight the specific area in which Kealing most excels, as well as the area in which Kealing can improve most.

Figure 1. Student Climate Survey Subscales for Kealing and all Middle Schools, 2010-2011

Kealing's highest score on the 2010-2011 Student Climate Survey was for academic self-confidence, which measures students' motivation and self-efficacy. We encourage your campus to continue working with students to promote this positive learning environment and share your strategies with others.

Kealing's lowest score on the 2010-2011 Student Climate Survey was for behavioral environment, which measures the extent to which students respect each other, follow the rules, and feel safe at your campus. Higher ratings of behavioral environment have been associated with academic achievement. For resources on how to improve your campus' behavioral environment, please visit AISD's Child Study System website: <http://www.childstudysystem.com>

The following pages contain more detailed information regarding Kealing's student climate results from 2008-2009 to 2010-2011. Please review the individual items on each subscale with particular attention to how Kealing's average ratings have changed or remained consistent over time. Please note that some subscales have changed from previous years, making longitudinal comparisons inappropriate for some items and subscales. For items and subscales where longitudinal data are available, statistically meaningful changes are flagged with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.

Note. Response options ranged from 1 = *never* to 4 = *always*. It is desirable to have a response of at least 3.0. Subscale comparisons across years are no longer available due to the addition of items 29 and 30, which are from the Control subscale of the Tripod survey. The Tripod survey was developed by Ron Ferguson and has been administered to schools across the country over the last decade. The Tripod survey was used in the Gates Foundation's Measures of Effective Teaching (MET) Project. The survey is designed to assess the degree to which students agree with a variety of statements designed to measure the following dimensions: caring, captivating, conferring, controlling, clarifying, challenging, and consolodating. For more information, please visit: <http://www.metproject.org/partners#cambridge>. Response options for the Tripod items were changed to reflect the 1 = *never* to 4 = *always* scale.
