

2010-2011 AISD Student Climate Survey Lamar Middle School

Research indicates that school climate can either be a positive influence on students' learning environment, or can serve as a significant barrier to students' learning. Indeed, elementary school teachers in Austin Independent School District (AISD) whose students provided positive ratings of behavioral environment, teacher support, adult fairness and respect, and academic self-confidence had students who made greater growth on TAKS in 2009-2010 than did their peers whose students rated school climate less favorably.*

The following tables show the total number of surveys students at Lamar returned in 2010-2011 (Table 1), the response rate by grade (Table 2), and the distribution of responses by race/ethnicity compared with the population (Table 3) for students at Lamar.

Table 1. Number of respondents for:		All Middle Schools
	Lamar	
# of surveys returned	519	10,939
# of students	598	15,194
% of students represented	87%	72%

Note. Population data reflect enrollment as of the PEIMS snapshot date in October 2010. Students' grade level and ethnicity were self-reported. The new "ethnicity/race" reporting allows for students to first choose their ethnicity (Hispanic/Latino or non-Hispanic/Latino) and then choose one or more of five race values.

Table 2. Response rate by grade for Lamar, 2010-2011			
grade	# of students	# of responses	response rate
6th grade	195	177	91%
7th grade	180	147	82%
8th grade	223	194	87%

Table 3. Distribution of responses by ethnicity/race for Lamar relative to Lamar's school population, 2010-2011

Ethnicity	% of population	% of responses
Hispanic/Latino	47%	48%
Race		
American Indian/Alaskan Native only	10%	4%
Asian only	2%	7%
Black/African American only	12%	16%
Native Hawaiian/Other Pacific Islander only	0%	2%
White only	71%	59%
Two or more races	5%	13%

Figure 1 depicts Lamar's average student climate survey ratings for 2010-2011, compared with average ratings across all Middle Schools in 2010-2011. Scores over 3.0 are desirable, as indicated by the green line. Please note the green and red text boxes that highlight the specific area in which Lamar most excels, as well as the area in which Lamar can improve most.

Figure 1. Student Climate Survey Subscales for Lamar and all Middle Schools, 2010-2011

Lamar's highest score on the 2010-2011 Student Climate Survey was for academic self-confidence, which measures students' motivation and self-efficacy. We encourage your campus to continue working with students to promote this positive learning environment and share your strategies with others.

Lamar's lowest score on the 2010-2011 Student Climate Survey was for student engagement. This subscale measures the extent to which students enjoy their schoolwork and learning. We encourage your campus to improve the ways in which teachers provide instruction that is relevant and engaging for students.

The following pages contain more detailed information regarding Lamar's student climate results from 2008-2009 to 2010-2011. Please review the individual items on each subscale with particular attention to how Lamar's average ratings have changed or remained consistent over time. Please note that some subscales have changed from previous years, making longitudinal comparisons inappropriate for some items and subscales. For items and subscales where longitudinal data are available, statistically meaningful changes are flagged with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.

Note. Response options ranged from 1 = *never* to 4 = *always*. It is desirable to have a response of at least 3.0. Subscale comparisons across years are no longer available due to the addition of items 29 and 30, which are from the Control subscale of the Tripod survey. The Tripod survey was developed by Ron Ferguson and has been administered to schools across the country over the last decade. The Tripod survey was used in the Gates Foundation's Measures of Effective Teaching (MET) Project. The survey is designed to assess the degree to which students agree with a variety of statements designed to measure the following dimensions: caring, captivating, conferring, controlling, clarifying, challenging, and consolidating. For more information, please visit: <http://www.metproject.org/partners#cambridge>. Response options for the Tripod items were changed to reflect the 1 = *never* to 4 = *always* scale.
