

# Results of the 2010 Student Substance Use and Safety Survey O. HENRY MIDDLE SCHOOL

#### **Description of Survey**

The federal Title IV Safe and Drug Free Schools and Communities grant requires annual needs assessment and evaluation of substance use and safety issues. Consequently, each year a self-report student survey of substance use and school safety is administered to a random, representative sample of AISD students. The survey is used to track student knowledge, attitudes, and self-reported behavior over time. In the Spring of 2010 a sample of 8,162 students in grades 6-12 submitted valid responses to the district's annual survey of substance use and safety issues, yielding a response rate of 70%. Selected item results are attached. These results should be shared with the campus Positive Behavior Support (PBS) team, Campus Advisory Council, and others involved in campus safety planning efforts for your school.

#### How should sample data be interpreted?

When it is not feasible to survey an entire population, samples are used instead. However, when a sample is used to make inferences about a population the results must be interpreted with caution. For example, although 87% of a sample may select a particular survey response, this does not necessarily mean 87% of the entire population feels the same way. To interpret the sample data cautiously, we have used the following information to construct an interval that describes the range within which the result for your campus population is likely to fall:

- Population size: In this case, the number of students at your campus.
- > Sample size: In this case, the number of survey respondents from your campus.
- Desired level of confidence: In this case, 95%.

The 95% confidence interval is commonly used, indicating that you can be 95% confident that the true population result will fall within the constructed interval.

#### How should Confidence Intervals be used to interpret your campus data?

Based on the O.Henry Middle School sample of 279 students and population enrollment of 979, the confidence interval for O.Henry Middle School is + and – 5 percentage points.

To make inferences about your campus population using the sample data, the results should be interpreted with the computed confidence interval of **5** percentage points on each side of the sample statistics. For example, in 2010 28% of respondents from your campus indicated that their friends belonged to gangs (see Q16, p.9). Applying the confidence interval (i.e., adding and subtracting **5** percentage points) to the 28% yields a range of 23% - 33%. Therefore, you can be 95% confident that somewhere between 23% - 33% of all students at your campus would indicate that their friends belong to a gang. When making comparisons between item results from year to year, please remember that small changes may have occurred by chance alone. The confidence interval for 2009 was 5 percentage points. Therefore, only differences of 10 percentage points or greater (5%+5%) should be considered statistically significant when comparing the results from two different years.

2010	48%	52%	38%	33%	29%	

Note: Numbers may not sum to total because some students skipped the demographic questions.

Q22: Do one or both of your parents usually attend school sponsored open houses, PTA meetings or other school events?

Q23: During this school year, have you brought any of the following items to school?

	O. Henry 2009-2010	Percentage point change from 2008-2009*	All middle schools 2009-2010
Knives	8%	1	6%
Illegal drugs	8%	0	6%
Other weapons	6%	-2	6%
Prescription drugs	5%	-3	5%
Tobacco	3%	-3	4%
Alcohol	4%	-3	4%
Gun	4%	0	3%
None of the above	85%	0	87%

<sup>\*</sup> Negative percentage point changes indicate <u>fewer</u> students reported bringing those items to school in 2009 – 2010 than in 2008 – 2009.

Q26: Of the following, which do you consider to be the <u>most serious</u> problem on your campus?

	O. Henry 2009-2010	Percentage point change from 2008-2009*	All middle schools 2009-2010
Student fighting and physical aggression	17%	-9	29%
Marijuana use	31%	20	17%
Student harassment, threats, and intimidation	16%	1	13%
Student weapon possession	3%	-2	5%
Prescription drug use	5%	1	5%
Student vandalism, criminal mischief	7%	0	2%
Violence or threats toward staff	2%	0	2%
Tobacco use	2%	0	1%
Alcohol use	1%	-2	1%
None of these are serious problems on my campus	17%	-9	25%

Note. Percentages may sum to more than 100% because respondents were allowed to choose multiple items.

Q7. During this school year, have you received any information on drugs, alcohol, or violence from any of the following school sources?

	O. Henry 2009-2010	Percentage point change from 2008-2009*	All middle schools 2009-2010
