RESULTS OF THE AISD HIGH SCHOOL EXIT SURVEY CLASS OF 2007

REAGAN HIGH SCHOOL

The fifth annual Austin ISD High School Exit Survey was administered electronically to seniors in every AISD High School during the Spring of 2007. This report contains the results for the Class of 2007, along with a longitudinal summary of responses, where available¹.

The survey is organized into five general topics: Postsecondary Intentions, Postsecondary Preparation, Campus Climate and High School Experiences, Technology Usage, and Parent Involvement. Individual item results are presented, both for your campus and for all High Schools.

The district-wide response rate for the High School Exit Survey remained similar to that of previous years (Table 1). Surveys were received from 3,235 students in the Class of 2007. The survey sample once again closely resembles the ethnic and gender distribution of the district's senior class, indicating that the results are representative of the entire senior class population.

Table 1. AISD High School Exit Survey Response Rates, Classes of 2004 to 2007

	Percentage of Enrolled Seniors Responding ²			
	Class of 2004	Class of 2005	Class of 2006	Class of 2007

ALL HIGH SCHOOLS	81.5%	85.3%	86.0%	82.0%

INDIVIDUAL ITEM RESPONSES FOR REAGAN HIGH SCHOOL

Results for your campus and all High Schools are presented below. Please use these data to identify trends in the responses of your seniors over time, and to examine how your campus results compare to the results for All High Schools.

¹ Previous years' data not available for items indicated with **.

² Corrected response rate for All High Schools in 2007 is 87.0%. Please see Appendix for detailed information about campus response rates for 2007. Response rates are based on enrollment during the 6th six weeks reporting period. See Appendix for more detail regarding survey respondents. Note: Due to enrollment of some Special Education students with severe cognitive disabilities, a 100% uncorrected response rate is not expected.

Item 1. What is the ONE thing that you especially want the administration of AISD to know.

Themes from this open-ended comment section have been identified and summarized each year. Generally, comments remain consistent from year to year; commonly identified themes expressed by the Class of 2007 include:

- **Respect.** Students continued to express a desire to be treated with respect and fairness by school staff, including administrators, office/attendance staff, hall monitors, security and parking lot personnel. Many felt that they were treated with suspicion and disrespect as a result of the behavior of other students. Students also were concerned that some rules (e.g., parking, dress code, off-campus lunch) were enforced inconsistently.
- **Academics.** Many students wished they had been told about the importance of good grades and rigorous coursework starting as early as middle school. They also questioned the quality of instruction during High school. Students stressed the importance of learning about college requirements and the college application process earlier in their high school careers. Negative comments about TAKS also were widespread.
- **Attendance and Exemption Policies.** Students particularly were upset about the elimination of final exam exemptions, and many comments indicated that students are more likely to skip classes now that attendance is not used for final exam exemptions. Students also expressed dissatisfaction with tardy policies, particularly those that result in arriving even later to class.
- **Dress code.** Students again expressed dissatisfaction with dress codes, and did not believe that style of dress interferes with the learning process. Many would have liked to wear hats.
- **Food.** Students at many campuses were unhappy with the cafeteria food and wished for better tasting, healthier options. Some also complained about losing vending machines.
- **Facilities.** Students were disheartened by lack of attention to school facilities, particularly the cleanliness of restrooms. Many students commented on the lack of towels and soap.

SPECIFIC COMMENTS FROM THE CLASS OF 2007 FROM REAGAN HIGH SCHOOL³:

- Students made 88 total comments; 59.1% of comments were positive, 40.9% were negative.
- The most frequently mentioned topics were *General Positive Comments* (positive comments about school or AISD with no particular topic mentioned), *Advising*, and *Academics* (especially negative comments about TAKS).
- **Reagan is a good school.** Many students commented that they want the AISD Administration “Reagan isn’t as bad as you think.” Examples of these comments include:

Reagan is a good school just like any other although many people doubt that because of the things that have occurred over the past years and the student's performance but is not only our fault nor the teachers nor the administration. I think that the real problem is AISD because they keep on changing Reagan's administration and principal and trying to make changes when they haven't spent time here and analyzed the school well.

Reagan has changed my life in a positive way.

I would want administration of AISD to know that Reagan is not a bad school and without [name removed] of Project Advance, college wouldn't have been an option for a lot of kids.

Reagan isn't a bad school it just needs some structure and keep the same administration.

reagan isn't bad

³ All student quotes are taken directly from the survey, as typed in by the students. Examples are given to illustrate common themes. A complete list of student comments can be found in the Appendix.

that not because the school one is attended has a bad reputation means that all the students are the same.

that is a good school. and there are sometimes at this school that would make other people seem like it's a bad school like for instance the fighting and the skipping that students do but other than that it's a good school.

Reagan is not as bad as it sounds violence wise

- **Praise for Project ADVANCE.** Seniors at Reagan also applauded Project ADVANCE:
I attend Reagan High school as a senior, and our school has this program called Project Advance. Without this program I would be totally lost in my college findings. It's helped me so much

My Project Advance Advisor has done such an awesome job helping us get ready for college.

I would want administration of AISD to know that Reagan is not a bad school and without [name removed] of Project Advance, college wouldn't have been an option for a lot of kids.

If it wasn't for Project Advance I wouldn't be going to college

My Project Advance Specialist, [name removed], has helped the entire senior class at Reagan advance to the next level of education better than anyone else on our campus. Project Advance with Ms. Whitney has been a really big help to me and my friends

That the district can't close Project ADVANCE down at Reagan. Because where are future graduates going to gain knowledge about college and the admission process?

I want to say that [name removed] of Project Advance has helped me with everything. All the seniors at my school who got accepted where because she took the time out of herself to do anything and everything she could for us. At first I thought about firing her. How dare you try to take away from the students next year by not having her around.

The thing that I would want the administration of AISD to know is that the program, Project Advance, was the most helpful thing to help me along the way in college prep. Project Advance has not only helped me but a lot of other people here at my school. Without Project Advance, I don't think that I would have been able to do all the required things that I would have needed to do in order to go to college.

Project Advance saved me from the dreadful despair of not going to college. I'm glad that Project Advance was here to help me the way that it did. Project Advance is a great program!!!

Notes:

1. Response rate estimates are limited in several ways, including but not limited to the following: (a) students may have moved from one campus to another during the survey administration period, (b) students may have withdrawn during the period, and (c) some students may have been ineligible to graduate because of TAKS, course failure, etc., and therefore elected not to take the survey or were not included with those who did.

2. Only 2 students from International HS completed the survey.

3. Ineligible students who were removed from the final list primarily included those who were cognitively unable to take the survey. Lists were provided by survey administrators, but not verified against student records.
