

2010-2011 AISD Parent Survey Zavala Elementary School

Strong relationships among staff, students, and parents are critical to student success. In particular, parent involvement in education is associated with a high level of student achievement (for a meta-analysis see Fan & Chen, 2001). These survey results provide campuses with feedback on how parents feel about their treatment by school staff, the school's educational environment, and how parents describe their involvement in their child's education. The following report contains the results of the 2010-2011 Parent Survey for Austin Independent School District (AISD); longitudinal data are provided where applicable.

New Federal Standards for Collecting and Reporting Ethnicity and Race

Starting in 2010-2011, districts were required to report race and ethnicity using revised standards. The new standards require a person to first select his/her ethnicity (Hispanic/Latino or non-Hispanic/Latino) and one or more of five race values. Since more than one race value may be chosen, percentages might not add to 100.

Note. Students' grade and ethnicity were self-reported. Population data reflect enrollment as of the October 2010 PEIMS snapshot date.

A summary of Zavala Elementary School survey results for the 2010-2011 school year is presented in figure 1. Scores over 3.0 are desirable, as indicated by the green line. Also, please note the green and red boxes that highlight the specific area in which Zavala most excels, as well as the area in which Zavala can improve most.

Figure 1. Parent Survey subscales for Zavala Elementary School and all AISD Elementary Schools, 2010-2011

Zavala's highest score on the 2010-2011 Parent Survey was Teacher Expectations. This subscale is designed to measure expectations parents believe that teachers have for their children. We encourage your campus to continue fostering a positive learning environment with rigorous teacher expectations for all students.

Zavala's lowest score on the 2010-2011 Parent Survey was Parental Assistance, Communication, and School Involvement. This subscale asks parents to report the frequency with which they participated in a variety of school-related activities, both at home and at their child's school. We encourage your campus to consider ways to work with parents to promote their involvement in their child's education.

Note. In addition to the subscales reflected in figure 1, parents responded to items regarding the Superintendent and Central Office Staff. For more information, see page 8.
